

# Walking floor Capacity and measurements

## Body Capacity

- 90 Cu Yds to 126 Cu Yds  
(70 CuM to 97 CuM)

## Standard features

- Constructed from hi-grade aluminium, snap-lock panels
- Designed with strength and payload in mind
- Rear lights protected from damage
- Lower center of gravity for safety
- Full width chassis & axle track for stability
- 2 pac paint finish for protection
- EBS braking system with full data-logger feature

## Strength by design

- Substantial top rail to prevent side wall deformation
- Side uprights spaced at 500mm (20") for extra strength
- Abrasive resistant wear plate. (400 Brinell grade)

## Options

- Engine Powerpack / VM / Lomardini / Hatz
- 1/2 net manual / hydraulic sheeting system
- 1 piece hydraulic sheeting system
- Payload weighing system
- Nameboards for livery
- Lifting Axle with auto drop feature
- Roll stability program for extra safety

## Controls

- Manual / Pneumatic over hydraulics / in-cab controls
- 2 handed rear door controls to PM 52 Standard
- Remote control option for all functions
